Education

De La Salle University Manila

Manila, PH

Bachelor of Science in Computer Science - Major in Software Technology

Oct 2026 (expected)

Consistent Dean's Lister

Relevant Coursework: Advanced Software Engineering, Data Structures and Algorithms, Human-Computer Interaction

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS, SQL, Python, C, C#, C++, Java

Frameworks & Libraries: React, Angular, Vue, Tailwind CSS, .NET, Node.js, Flask, Bootstrap

Tools & Databases: PostgreSQL, MySQL, Supabase, MongoDB, Git, GitHub, Figma, Canva, Office 365, VS Code

Experience

ABBE TECHNOLOGY SOLUTIONS, INC.

Makati City, PH

Web Developer and UI/UX Design Intern

April - June 2026

- Built and shipped the Work Schedules feature for an HRIS platform using Angular and .NET, integrating RESTful APIs for CRUD operations, custom date-range filtering, and multi-schedule editing across admin and employee views
- Delivered UI for Onboarding Employees and Work Schedule pages aligned with the existing PrimeNG-based design system, validating data accuracy through API/schema analysis and cross-functional stakeholder consultation
- Authored and executed 50+ manual test cases across Management Schedules and Attendance features, uncovering critical validation gaps and data isolation issues before release

FIVERR, UPWORK

Pasig City, PH

Freelance Video Editor & Graphic Designer

May 2023 - Dec 2025

- Led a team of 3 delivering 520+ social content and design projects across Instagram, YouTube, and TikTok for an international client base, maintaining a 99% on-time delivery rate

Projects

Real-time Typing Practice Application with Classical Novels

Sept 2025 - Jan 2026

- Built a Supabase-backed book library by designing a normalized PostgreSQL schema for books, chapters, and reading progress, and integrating Epub.js to parse EPUB files and extract chapter metadata for population and querying via PostgREST API
- Engineered a high-performance typing practice site using Vue and TypeScript achieving a 42ms INP by optimizing reactive state and DOM updates for real-time WPM and accuracy tracking
- Built a mobile-first responsive frontend in Tailwind CSS featuring a custom keyboard visualizer and dynamic UI components, ensuring consistent styling across all devices

Distributed Enrollment System

Nov - Dec 2025

- Developed a React frontend for a distributed enrollment system with role-based access for students and faculty, communicating with a REST API Gateway that bridged to multiple Dockerized gRPC microservices (login, courses, enrollment, and grade encoding)
- Managed global auth state and persistent sessions using Context API and localStorage, enforcing validated login flows with React Hook Form and Zod
- Reduced component code duplication by ~40% via a shared component layer (shadcn/ui + Tailwind)

Barangay Parang

May - Nov 2024

- Led a frontend team of 6 through the end-to-end design-to-development lifecycle, designing high-fidelity Figma prototypes and translating them into responsive, role-based dashboards for different user types
- Iterated on interface designs across bi-weekly Agile sprints based on direct client feedback, refining usability and layout using Bootstrap and Handlebars
